PROFESSIONAL SUMMARY

AI Product Engineer with 8+ years of experience building real-world products across mobile, frontend, and backend systems. Specialized in prompt engineering, multi-agent orchestration, and AI-powered product execution. Strong fintech background integrating payment systems and handling transactional flows in production. Focused on turning AI capabilities into scalable, reliable, and production-ready systems.

CORE SKILLS

AI & Prompt Engineering

Prompt Engineering, Multi-Agent Systems, Context Engineering, LLM Workflows, AI-assisted Development, Code Generation, Refactoring Automation, AI Product Workflows

AI Stack

OpenAI, Claude, Gemini, Cursor, Windsurf, Framer AI, Figma Make, Midjourney, Firefly

Fintech

Stripe, MercadoPago, Wompi, PayU, Kushki, Payválida, Conekta, Checkout Flows, Transaction Validation, Payment Systems

Engineering

React, React Native, Next.js, Node.js, TypeScript, Firebase, CI/CD, Clean Architecture

TOOLS

AI Agents & Dev

Cursor, Claude Code, ChatGPT, Gemini

GenAI Creative

Midjourney, Firefly

Payment Gateways

Stripe, MercadoPago, Kushki, Conekta

Testing

Jest, React Testing Library, Cypress, Playwright

CI/CD

GitHub Actions, Bitbucket Pipelines, CircleCI

LAST PROFESSIONAL EXPERIENCE

Senior Mobile Engineer (Team Lead) @ Cheaf

2024 - Present

Led development of mobile applications handling real transactional flows (checkout, delivery, validation). Applied AI-assisted workflows to accelerate development, refactoring, and feature delivery. Improved onboarding performance and reduced friction in critical flows. Increased reliability through better error handling and system design.

Mobile Engineer @ Teamcore

2024 - 2025

Developed mobile applications for data-driven operational systems. Worked with real-world execution workflows and performance-critical features. Used AI tools for code generation, refactoring, documentation, and faster iteration cycles. Focused on scalability, performance, and production reliability.

Senior Software Developer (Tech Lead) @ Somos Inmobiliarios

2025

Led development of a scalable platform with strong product orientation. Designed and implemented features for sales, learning, and growth. Applied AI-assisted workflows to modularize systems, accelerate execution, and generate documentation. Contributed to product and technical decision-making.

Frontend Engineer (Fintech) @ Aplazo

2022 - 2023

Owned and maintained payment and risk flows in a fintech environment. Implemented transaction validation logic and financial systems. Refactored critical modules aligned with evolving payment requirements. Focused on reliability and edge-case handling in financial products.
